

## Mission Statement

Your family deserves a balance of quality, value, personalized care, high technology and clinical excellence based on research, success rates and your comfort. Every effort has been made to offer you a well-developed philosophy of care, quality materials, efficient procedures, easy to

understand treatment options and a diverse range of dental care. You should feel comfortable with your dental health decisions.

*Our philosophy* involves preventing a condition from establishing itself or preventing it from worsening. The easiest way of preventing the decline of your oral health is to have your teeth professionally cleaned and examined on a regular basis, and practice effective home care. Research has shown a connection between oral health and heart disease as well as other conditions. Together, we will provide you with instruction and develop a personalized plan to optimize your long-term oral health. Your oral and overall health is our main concern.

Our Office Is Child Friendly!

# Invisalign® Braces

## The clear alternative to braces is here!

Invisalign uses a series of clear aligners that are custom-molded to fit you. Invisalign gradually repositions your teeth into a smile you'll be proud of. Having a confident smile can change everything and Invisalign makes the decision easy, because you can get a stunning smile without most people even noticing you're going through treatment. Ask us today if Invisalign is right for you!

## Dental Whitening

We create bright, white smiles with Sapphire™ Professional Whitening System, in office or take home whitening. Sapphire™ Whitening the more gentle way to whiten your teeth and there is Zero sensitivity, no harmful UV rays and it allows us to achieve dramatic results quickly. Apart from beautifying smiles you are also protected from demineralization and caries, thanks to the integrated fluoride.

# Your Children Deserve...

## ...Facilitated Speech Development

Narrow jaws can confine the tongue and interfere with normal speech. Functional appliances help ensure proper growth and greatly enhance a child's ability to speak normally.

## ...Healthy Jaw Joints

Many children with narrow jaws, deep overbites or receding lower jaws have unhealthy jaw joints which can cause: headaches, neck pain, dizziness, earaches, fainting, clicking or locking jaws, difficulty opening jaws or ringing in the ears. Early use of functional appliances can prevent or eliminate these problems.

## Functional Appliances Can Help Correct:

- Bite Problems
- Narrow Arches
- Deep Overbites
- Airway Problems
- Underdeveloped Jaws
- Crowded Teeth
- Jaw Joint Problems
- Thumbsucking Habits

## And Can Often Prevent:

- Removal Of Adult Teeth
- Lengthy Use Of Braces
- Fang-Like Tooth Appearance
- Crowding
- Speech Difficulties

# Adult Orthodontic Treatment

It's never too late  
to achieve your perfect smile!

Orthodontics involves the diagnosis, prevention and treatment of structural problems involving the jaws and malocclusion commonly known as bad bites. Orthodontic problems can affect your dental and general health as well as your personal appearance.

## Periodontal Disease

Early-stage periodontal disease (gingivitis) has relatively minor signs, such as red, swollen and bleeding gums. But untreated gingivitis can progress to periodontitis, a serious infection that destroys the soft tissue and bone that support your teeth, and eventually may cause tooth loss.

## Do You Have TMD?

This is a common term used to describe a jaw joint dysfunction. It occurs as a result of injury or imbalance of the jaw joints, muscles or any closely related structure. Our office is experienced and qualified to treat TMJ disorders. If you or someone you know has chronic headaches, neck and shoulder stiffness, ringing in the ears or even dizziness, let us know.

EARLY TREATMENT IS **KEY!**

Exceptional Care, Beautiful Results!
